## How the poll was conducted

The Kentucky Statewide Fairness Coalition survey was conducted by The Schapiro Group, Inc. of Atlanta, Georgia in November and December 2010. A total of 600 Kentuckians who are registered voters were interviewed by telephone. The sample was randomly selected from voter registration lists and is weighted to represent the state's population both geographically and demographically.

The margin of sampling error for the full sample is  $\pm 4.0$  percentage points. This means that there is a 95% probability that the response would fall within that range if every registered voter were polled. The margin of error for other subgroups is slightly higher.

## Sample characteristics

Men	45%	Democrat	40%
Women	55%	Independent	25%
		Republican	33%
18-39	32%	Attends religious services:
